

Hawk body-armour apron for humanitarian demining

Always aiming to achieve comfort and value for money, our Hawk body-armour (NATO STANAG 2920 V50 – 450m/s) is versatile enough for deminers and supervisors, providing vital area protection whether walking around or excavating anti-personnel mines. It is lighter and more comfortable than alternatives, and includes several special design features.

The Hawk body-armour can be worn short, medium or long, depending on your activity at the time. Adjustment is as simple as unfastening a Velcro tab.

With a multi-layer Kevlar/polyamide inner covered by a washable Cordura® textured nylon outer that is exceptionally long-lasting and resistant to tears and abrasions, it weighs less than 2.5kg. The cover is removable and washable, so can be replaced at a later time. A variant with a protected back is available on request.

After adjustment to suit the individual, the shoulder straps need not be undone again.

The Hawk includes genital-protection that can be worn when wanted, and folded away inside the armour cover when it is not wanted.

Colours may vary between dye lots.

SD Part no.: SKU2016

The Hawk body-armour seen from the back, showing the (design-registered) genital protection that can be folded inside the armour when it is not wanted.

NOTE: Like most other PPE, SD armour is designed to be water-resistant. Users should avoid getting the core of any armour wet because this can reduce the protection it offers. If the core of armour gets wet, allow the garment to dry naturally before use. Do not tumble-dry or expose to heaters.
